EDUCATION

Master of Computer Application (MCA) — Viva Institute Of Technology
CGPA: 7.85 — *July 2024 – April 2026*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Frontend: Next.js, React.js, Redux Toolkit, Parcel, React Router, Framer Motion, GSAP
Backend: Node.js, Express.js, PostgreSQL, MongoDB, Mongoose, JWT, Cloudinary
Tools: Git, GitHub, Postman, Firebase, Lighthouse, npm, VS Code

EXPERIENCE

Full Stack Developer Intern | View Impact — Cinute Infomedia
Tech Stack: Next.js, TypeScript, Node.js, Tailwind CSS, Framer Motion — *Mumbai*
- Engineered a high-performance landing page to establish market presence and **enhance brand identity** for the company's digital services portfolio.
- Spearheaded the end-to-end development (**Frontend, Backend, and database**) of the company's proprietary product, **TCL**, while simultaneously securing **30+ B2B clients**.
- Maximized site authority and user engagement by implementing **internal linking strategies** and backlinking, wrapped in a modern, aesthetic UI that ensures optimal **Core Web Vitals**.

Frontend Developer Intern | View Impact — Testriq QA Labs
Tech Stack: Next.js, React, Google Analytics, Technical SEO, JSON-LD — *Mumbai*
- Designed and developed a **beautiful, fully responsive UI** for a conversion-focused landing page to market testing services and solidify the brand's digital footprint.
- Optimized lead capture funnels and implemented **Open Graph (OG) & Twitter images** to boost social visibility, successfully generating **540+ qualified leads** via integrated forms.
- Achieved **90+ Lighthouse performance scores** across mobile and desktop by optimizing **Core Web Vitals** and integrating **JSON-LD structured data** for rich search results.

PROJECTS

SiteLedger AI – Site, Labour & Invoice Mgmt. | *Next.js, TypeScript, Gemini, MongoDB, jsPDF* — Live Demo | Code
- Developed a comprehensive construction management platform to oversee **workers and project sites**, featuring a **dual-verification attendance system** (worker and admin) for accurate labor tracking.
- Engineered a professional invoicing module that enables users to generate high-fidelity financial documents and instantly **export them as PDFs**.
- Integrated **Generative AI** to automate invoice documentation, instantly synthesizing transaction details into concise 1–2 line summaries to eliminate manual data entry.

Pharmalytix AI – Pharmacy Stock, Sales & Profit Mgmt. | *Next.js, TypeScript, Gemini, PostgreSQL* — Live Demo | Code
- Engineered a robust pharmacy management system implementing **Role-Based Access Control (RBAC)** to secure distinct operational workflows for Admin, Pharmacist, and Cashier roles.
- Integrated **Google Gemini AI** to forecast inventory depletion and optimize stock levels, alongside comprehensive modules for managing suppliers, medicines, returns, and sales cycles.
- Designed an interactive analytical dashboard featuring **KPI cards** and dynamic visual charts to track revenue trends and actionable business insights in real-time.

TLDRize Chrome Extension – Summarize & Save Huge Web Content | *React.js, Gemini API, MongoDB* — Video | Code
- Developed a **browser extension** that leverages Generative AI to instantly distill **huge web content and blogs** into concise summaries.
- Implemented **web scraping** to extract page content and integrated features for customizable outputs (Detailed, Brief, Bullet-points, ELI5) with **one-click clipboard copying**.
- Integrated **MongoDB** to **save generated summaries** for future reference, enhancing user productivity by creating a personal archive of condensed insights.
